

Kyatham Ashwitha Reddy

Ashwitha Reddy

[AshwithaReddy9](#)

Objective

Aspiring Data Engineer with strong Python, SQL, and AI/ML expertise. Skilled in building scalable data pipelines, automation workflows, and intelligent applications. Eager to contribute to Snowflake’s Data Cloud by leveraging big data technologies, CI/CD practices, and AI-driven automation.

Education

B.Tech(AIML) - JNTU(H)		2023-2027
St.Peter’s Engineering College		84.875% (till 3-1)
Intermediate	2021-2023	95.8%
SSC	2020-2021	90%

Technical Proficiency

Programming Language : Python , Java(Intermidate),SQL(Advance),Numpy,pandas

- Version Control & CI/CD: Git, GitHub, GitHub Commands, GitHub

Web Development: Streamlit, HTML, CSS, REST APIs, JSON

Cognitive Skills

Creative Problem-Solving
Analytical Thinking
Pattern Recognition

Primary Skill Set

Tools : Jupyter Notebook,vs code , MySQL ,Git/GitHub

Core Concepts:

Web Application Development, Database Management, API Integration, Object-Oriented Programming

Programming Language Platform

Hackerrank :

Java Badges :Gold (5 star)

SQL : Gold(5 star)

Internship Experience

Company Name :Tech Saksham(SAP,Microsoft,AICTE,Edunet Foundation) (DEC 2024 - Jan 2025)

Role : AI/ML Intern

Tech stack : Python (NumPy, Pandas, Scikit-learn, TensorFlow),Streamlit (model deployment)

Description :

- Completed an AI-focused internship under the TechSaksham initiative by SAP, Microsoft, AICTE, and Edunet Foundation.
- Built a working model with Streamlit to recognize and classify images, gaining hands-on exposure to end-to-end ML workflows.
- Acquired practical knowledge in data preprocessing, model training, evaluation, and deployment.

Responsibility:

- Developed and trained machine learning models for image classification tasks
- Applied supervised learning techniques and optimized model performance using evaluation metrics.

AI Intern | Infosys Springboard

February 2026 – April 2026

Project: Swift Visa – AI-Powered Visa Assistance Portal

Tech Stack: Python, Streamlit, APIs, JSON

- Developed the Swift Visa web application and contributed to feature implementation.
- Integrated APIs to retrieve and process visa-related information.
- Implemented session management for improved user experience and workflow handling.
- Collaborated with team members to design, test, and enhance application functionality.
- Participated in project planning, debugging, and deployment activities.
- Demonstrated leadership, teamwork, communication, and networking skills throughout the project lifecycle.

Achivements

Runner-up in ideathon program at our college
